

Dear Neighbor,

Will you take a minute to help preserve the unique character of Venice?

The corporate homogenization of Venice has already begun with the opening of four carry-out formula food establishments in the last six months! More chains will follow unless we can pass an ordinance that will stop them in their tracks. Venice Unchained is committed to passing this law, and we need to gather community support. Won't you please go to www.veniceunchained.org, find out about the issues and progress so far, and sign the petition?

Formula stores are assailing main streets across America, undermining mom and pop shops, exporting profits from the community, and assaulting visual and architectural integrity. But many communities have placed limits on their power, and we can too! Go to www.veniceunchained.org and make a difference!
